

## Lumen Expands “Colombia XV” Data Center in Bogotá

**BOGOTÁ, Colombia, October 8, 2020** – [Lumen](#) (NYSE: LUMN) has expanded its “Colombia XV” data center in Bogotá to help meet enterprise customers’ demands and enable companies to fully leverage their applications with enhanced data access, administration and management. The expansion consolidates its footprint while adding an additional 450 square meters of space, creating nearly 2,400 square meters of white area in the data center.

“We are in a place where massive data-driven technology is advancing the way we work and live,” said Felipe Gómez Jaramillo, data center, security and cloud director for Lumen, in the LATAM Andean cluster. “In this 4<sup>th</sup> Industrial Revolution, data becomes the pillar for groundbreaking business decisions so it’s important for this data to be properly stored, processed, assured, and analyzed.”

Additionally, these data centers provide the technology to address the demands that the market needs, allowing for scalable, effective, secure, and cost-effective solutions. Businesses across all industries are using this type of infrastructure and its access to Infrastructure as a Service (IaaS) to help increase cost effectiveness. Thus, enterprises can focus their investments and efforts in their core business, while assuring information security, management, and availability.

In addition to the hosting and housing services provided at Lumen’s data centers, companies have access to [Platform as a Service](#) (PaaS) offerings. They can receive a comprehensive technological infrastructure solution that’s fully managed and secure, such as private and public clouds, physical and virtual server farms, operational systems management and data bases, managed security, storage and backup.

“Lumen looks very different today than it did even just a few years ago, and the services and solutions we are delivering have changed as well,” said Gomez. “Lumen is focused on providing a technology platform that helps our enterprise customers take advantage of emerging applications and create amazing digital experiences, all of which calls for enhancing and upgrading our data centers.”

### Key facts
