

CenturyLink named a 'Leader' for data centre operations and management in IDC MarketScape for Canadian market

September 30, 2016

CenturyLink was named a "Leader" in the IDC MarketScape: Canadian Data Centre Operations and Management Vendor Assessment (Doc #CA40622416, Sept. 30, 2016). The IDC MarketScape measures the capabilities and offerings of data centre service providers and their qualifications to meet the current and future needs of Canadian organizations. CenturyLink delivers hybrid IT solutions for Canadian companies through robust platforms of [cloud services](#) and [managed hosting](#) combined with four CenturyLink data centres across Canada – two in Toronto, one in Montreal, and one in Vancouver – that are [connected](#) with CenturyLink data centres and cloud nodes around the globe. CenturyLink's enterprise-grade cloud infrastructure solutions have been offered in Canada since 2010, and address data sovereignty requirements for Canadian enterprises and multi-national corporations seeking to establish a local presence.
