

# Lumen Technologies Corporate Overview

**Lumen Technologies (NYSE: LUMN)** is a global integrated network solutions provider that unleashes the world's digital potential. We connect people, data, and applications – quickly, securely, and effortlessly – via one of the largest fiber networks in the world. In the age of AI and digital transformation, companies need access to an increasing amount of data and the ability to customize that access to match ever-changing needs. We use digital services, data and analytics to accelerate our customers' success and empower them to achieve their goals faster.

## How We Serve Our Enterprise Customers

Lumen empowers organizations with an effortless digital experience that makes it easy for customers to do business with us. Everything we do at Lumen takes advantage of our network strength. From metro connectivity to long-haul data transport to our edge cloud, security, and managed service capabilities, we meet our customers' needs today and as they build for tomorrow.

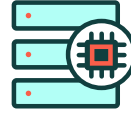

### Network Solutions

Scalable, cloud-based solutions like Network as a Service (NaaS), which provides dedicated high-speed internet access on demand; we also offer high-bandwidth connectivity through ExaSwitch for dynamically and quickly routing traffic between networks and the cloud

### Cybersecurity Solutions

Secure Access Secure Edge (SASE) controls and Distributed Denial of Service (DDoS) protections

### Edge Cloud Fabric

Cloud computing at the edge of the network, close to where data is generated and consumed

### Managed Services

Managed and professional services that enable customers' digital transformation

## Working at Lumen

We pride ourselves on people and culture and were ranked #1 for Communications & Telecom in the 2023 American Opportunity Index. With a focus on teamwork, trust and transparency, we believe that investing in our people and empowering them to nurture their potential is key to lasting success for Lumen and our customers.

## Our Brands

The parent company, focused on delivering digital communications services over our extensive fiber network to large enterprises, mid-market companies and public sector agencies. We operate one of the world's most heavily peered networks and are disrupting the industry as we transform from a telecom company to a technology company.

A subscription-based, fully digital platform for delivering fiber-based connectivity products and services to residents and small businesses in 16 states. Quantum Fiber uses the power of Lumen's extensive fiber-optic network, and we have more than 3.7 million Quantum Fiber-enabled locations in the U.S. and more than 900,000 Quantum Fiber subscribers.

The brand under which we continue to offer our legacy copper-based products and services, including broadband, voice, modems, Wi-Fi, and security/privacy protections to residential and small business customers.

Lumen's cyberthreat research and intelligence arm. The Black Lotus Labs mission is to leverage Lumen's network visibility both to help protect our customers and keep the internet clean. We see more, so we stop more.
